Tecomán, Colima, Mexico.

## Who we are.

Cítricos de Colima is an agro-industrial conglomerate established in the state of Colima, Mexico. The family business is dedicated to the production, packing and distribution of fresh fruits; bananas, limes and papayas.

Our company is engaged in the supply of high quality fresh fruits by the implementation of good agricultural practices in our crops and the highest quality and safety standards in each process of the production chain. More than 60 years of experience support our service and security and reliability of our produce.

### **Our values:**

**Honesty:** Our guideline in the relationship with our suppliers and customers.

**Quality:** We apply the highest quality standards in every product we use, every task we perform.

**Communication:** Communication within the members of our company and customers are intended to be fluid and sincere.

**People development:** We care about the personal and professional development of our people.

**Engagement:** Engaged in what we do and with our customers, always by giving the best of us.

## Cavendish banana

**Scientific name:** Musa Acuminata Lakatan.

**Description:** The outer skin of the cavendish banana is green color and turns yellow when it ripens. As it ripens the starches turn to sugar making a sweeter fruit.

**Packaging:** 40 lb box.

**Temperature:** 56° - 58° F.

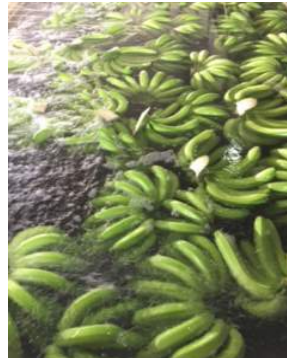

**Sizes and maturity:** The specifications of the product depend on the necessities of the customer.

**Growing season:** All year round, increasing production between june and october.

**Shelf life:** Depending on the week of maturity of the bananas.

**Production zones:** Colima and Michoacan, Mexico.

## Persian lime / Tahiti lime

**Scientific name:** Citrus Latifolia Tanaka.

**Description:** Seedless and semi-acid lime, its color is quite green although it yellows as it reaches full ripeness. Persian lime is thicker-skinned and less aromatic than key lime / mexican lime.

**Packaging:** 40 lb box / 10 lb box.

**Temperature:** 45° - 50° F.

<b>Sizes:</b>	<b>40lb box</b>	110's	150's	175 's	200 's	230 's
	<b>10lb box</b>	36's	42's	48's	54's	60's

**Growing season:** All year round, increasing production between march and september.

**Shelf life:** 20-24 days approximately if stored at ideal temperatures and 18-20 days in high season.

**Production zones:** Jalisco, Mexico.

## Hass avocado

**Scientific name:** Persea americana.

**Description:** Large sized fruit with dark green colored, it turns dark purplish-black when it ripens and yields to gentle pressure and it contains a single seed. Avocados contribute unsaturated “good” fats, and good fats can help the body absorb fat-soluble nutrients Vitamins A, D, K, and E.

**Packaging:** Depends on the customer.

**Temperature:** 40-45° F.

**Sizes:** Depends on the size of the box.

Avocado weight	+ 330 gr	300 – 330 gr	265 – 300 gr	205 – 265 gr	170 – 205 gr	150 – 170 gr	120 – 150 gr
