Frozen Fruit

Food Safety Policy

- We seek to satisfy the needs of our customers in the freezing process through continuous improvement and acting under the principles of food hygiene and safety (CODEX ALIMENTARIUS, NOM-251-SSA1) and Food Safety (FDA). We comply with the current regulations applicable to the organization by the Management System for Food Safety ISO 22000:2005 and are certified by the authorizing body SGS. The Freezing Plant is also Kosher certified.

ISO 22000

- ISO 22000 is an international standard that defines the requirements of a food safety management system which encompasses all organizations in the food chain from farm to table.
- The program combines key elements commonly recognized to ensure food safety in the food chain:
 - Interactive communication
 - Management Systems
 - Risk control through essential requirement programs, risk analysis plans and critical control points.
 - Continuous improvement and updating of the food safety management system
